

CARTRIDGE FILTERS

*The ultimate in fine dust
collection for long term use.*

*With 6 rubber paddles inside to
clean the pleats. The handle can
be swept from side to side
instead of around in circles, to
clean the whole circumference.*

*Seven times the filter area in the
pleated cartridge compared to the
same size bag.*

*Dust down to a tiny 3 microns
retained inside the machine.*

***1 Metre high units shown on a
typical twin dust extractor.***
